

Vignettes 8

Hi everyone

I hope you enjoyed the Cheltenham Camera Club Salon presentation. It was good to see some Cirencester Club entered photos doing well. As Mike Cheeseman mentioned, it would be good for us to have a go so if you want to learn more, the competition information can be found on

<http://www.cheltenhamcameraclub.co.uk/wordpress/salon/>. I think, for next year, it starts in January.

Monday's presentation - An evening with a Mike Dales ARPS.CPAGB

We've got Mike Dales coming next Monday. A colourful character and you may remember he was an excellent judge at one of last year's club competitions.

Mike has been active in both the Surrey and South London associations where he was a judge and also a regular speaker. His photographic interests are wide ranging but are especially concerned with travel and street photography: almost all his images have people in them. On Monday he will present an overview of his work, especially his personal (as opposed to club) photography. He will also take a look at those key moments when his photography evolved. Have a look at his website <http://www.mikedalesphotography.co.uk/>

Terry Neill

Maybe it's a generation thing but some of you might not have realised that many of those iconic 1960's photos you have seen of celebrities (candid and posed) were taken by Terry O'Neill who passed away last week. The BBC did a retrospective of his professional life which, along with some of his photos you can catch here <https://www.bbc.co.uk/news/uk-50452568>

"Plan B"

Every now and again you get caught out by the unexpected and in the case of Club meetings we will, one day, be faced with the non-appearance of a booked speaker. Traffic accident, family issues, whatever the reason, we will need to have a "Plan B" up our sleeve or, preferably, in the laptop. Mike & I will brainstorm but in the meantime any thoughts will be gratefully received. Over to you.

A short Vignettes this week.

See you Monday

Martyn (thehoneys@btinternet.com)

Mike (mike.cheeseman@btinternet.com)
